

# nimly connect

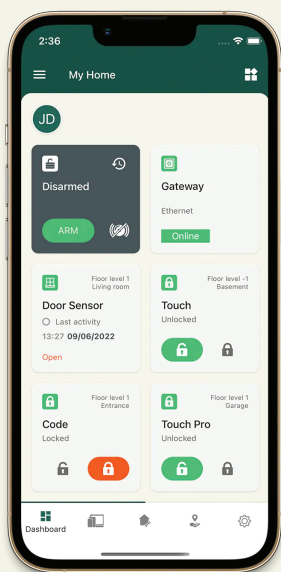

Smart home application by nimly

Unlock your smart home with our connect app. We are convinced that smart homes start at the front door. Using the latest technology we unlock the smart home for an easier everyday life, because we know that people care more about life than technology.

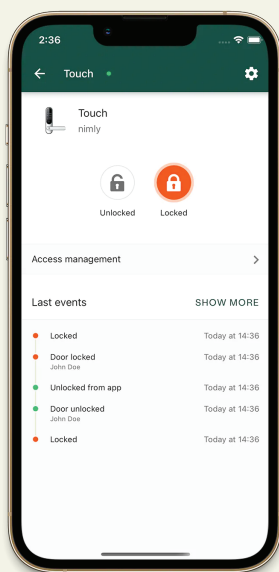

Receive notifications when your kids come home, when the carpenter enters with a temporary code and much more. Manage lock functions, grant access to your home with ease and enjoy the control of your home.

## nimly **unlocks** the smart home

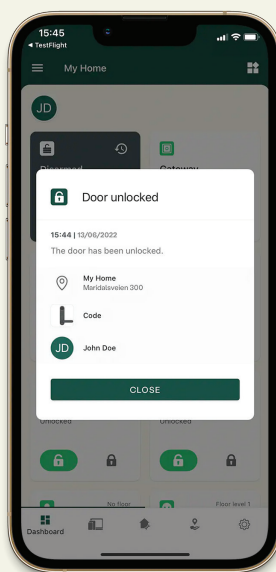

Get a complete **overview** of your home in the application.

See product status and control with ease from your dashboard.

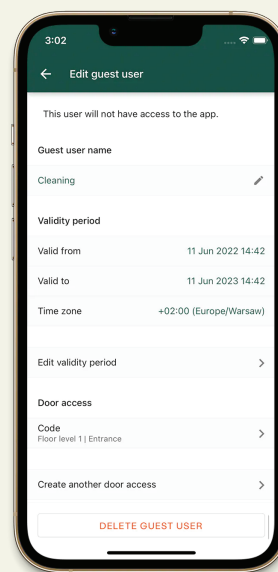

**Control** your smart locks, manage settings, and define user access within the app.

View the event log to see which user opened the lock and when.

Receive **notifications** when the lock is operated.

See which user entered your home.

Create **temporary** access codes for guests and other visitors.

Set the validity period for their need and let the access expire by itself.

**..and much more!**
