X LOCK

X LOCK

XLOCK opening tool for antenna

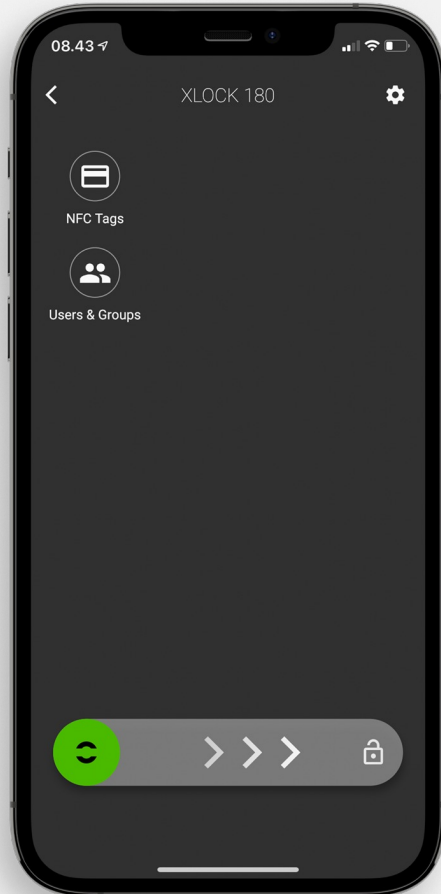

Access Micro USB for emergency opening (if battery was not changed in time)

X LOCK

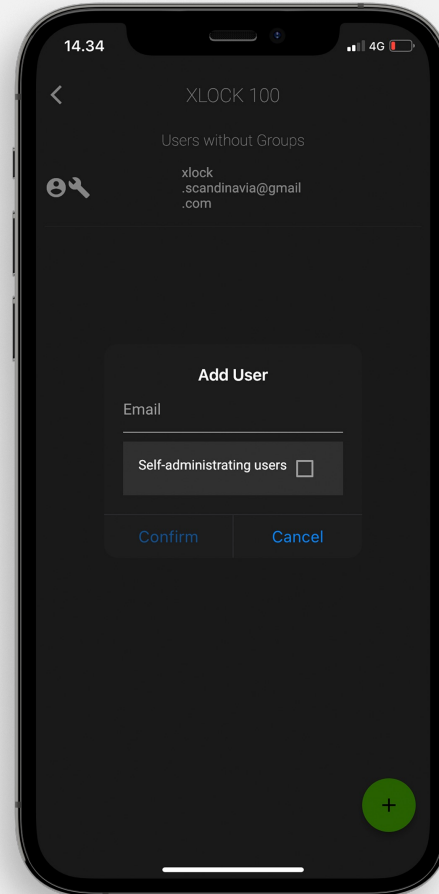

All your keys at hand.
At anytime and from anywhere.

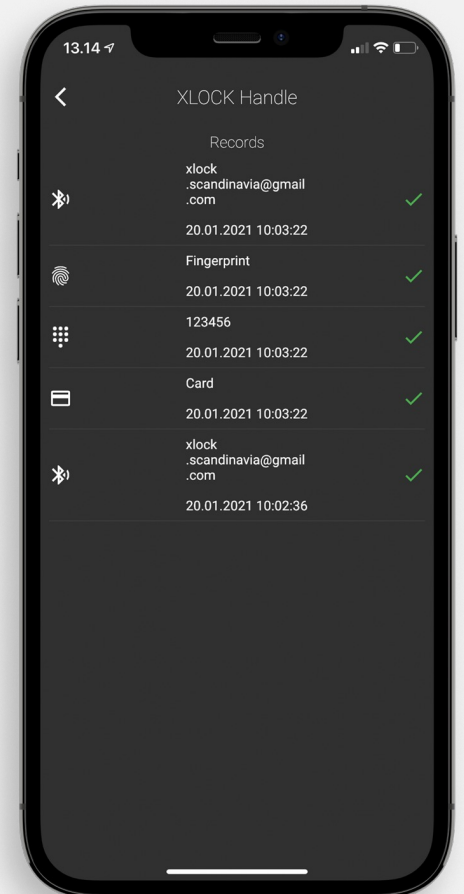

Unlock with a single swipe.

Grant, update and delete
users at anytime.

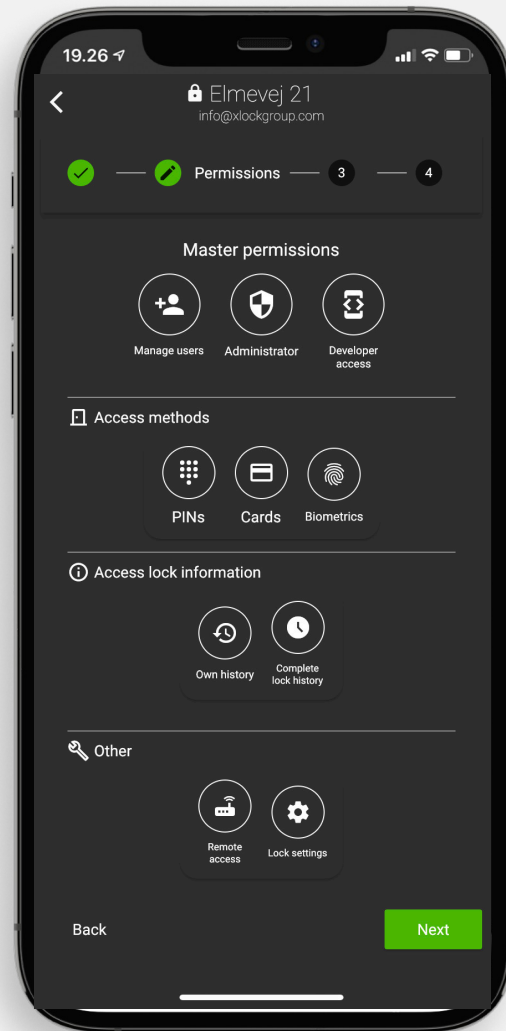

See who unlocked at what
time.

XLOCK LOCK MANAGER APP

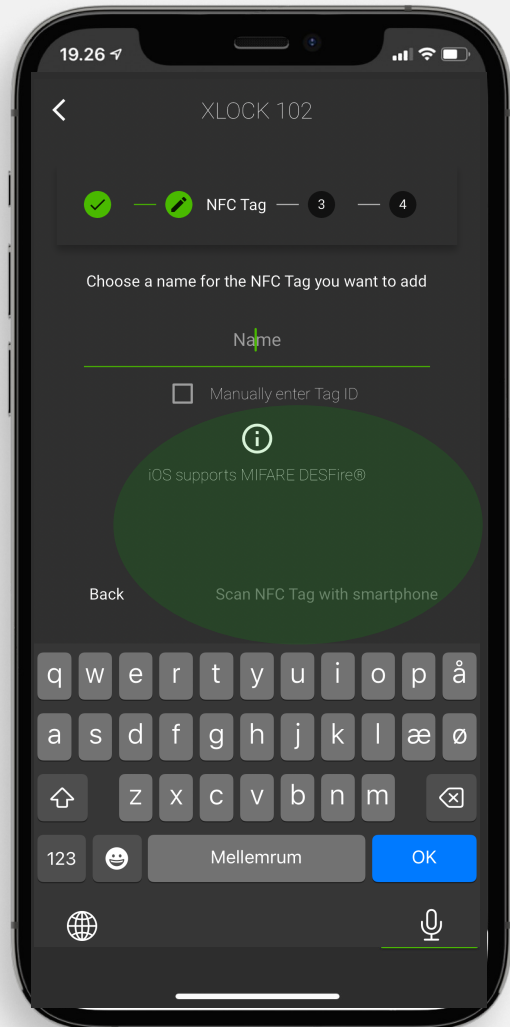

CLOUD BASED ADMINISTRATION WITH ULTRA-FLEXIBILITY

GRANT INDIVIDUAL ACCESS TO ADMINS AND USERS.

PROGRAMMING CARD DIRECTLY FROM YOUR SMARTPHONE

FROM ANYWHERE AT ANY TIME (GATEWAY REQUIRED)

NO OTHER PROGRAMMING DEVICE NEEDED.

Use your smartphone to scan your card's ID.

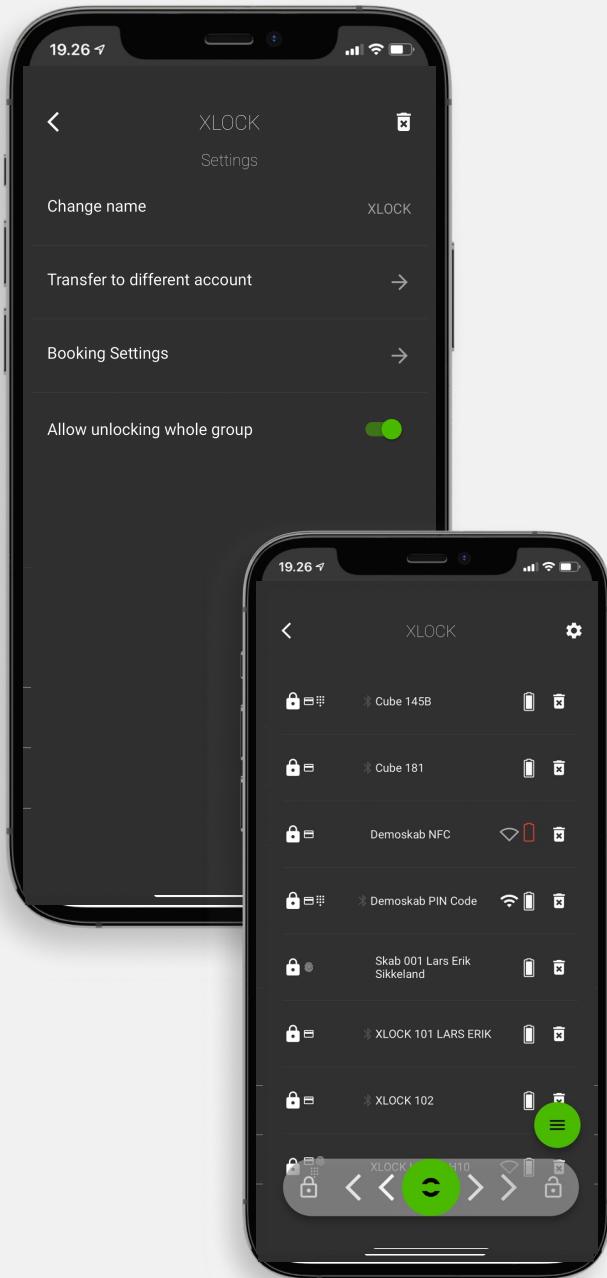

- iOS supports MIFARE DESFire
- Android supports MIFARE DESFire and MIFARE Classic

With just a few clicks you can program a card to your lock(s)
– even on the go.

GROUP UNLOCKING

**UNLOCK A WHOLE GROUP OF LOCKS
WITH ONE SWIPE.**

Have a wall of lockers or an area with several locks?
Then this feature is a must for your site!

MAINTENANCE REMINDER

GET A REMINDER TO SWITCH BATTERIES.

Via any Bluetooth action the battery status will be updated in the XL Lock Manager App.

If the batteries have less than 30% remaining, you will get an E-Mail sent with detailed information.

Maintenance reminder

These devices may be in need of attention soon:

- Lock name 1**
Battery at 5%
- Lock name 2**
Battery at 15%
- Lock name 7 very long here**
Battery at 30%

You can retrieve the current status inside the XL Lock Manager app.

Best Regards,
the XLOCK-Team

book iT

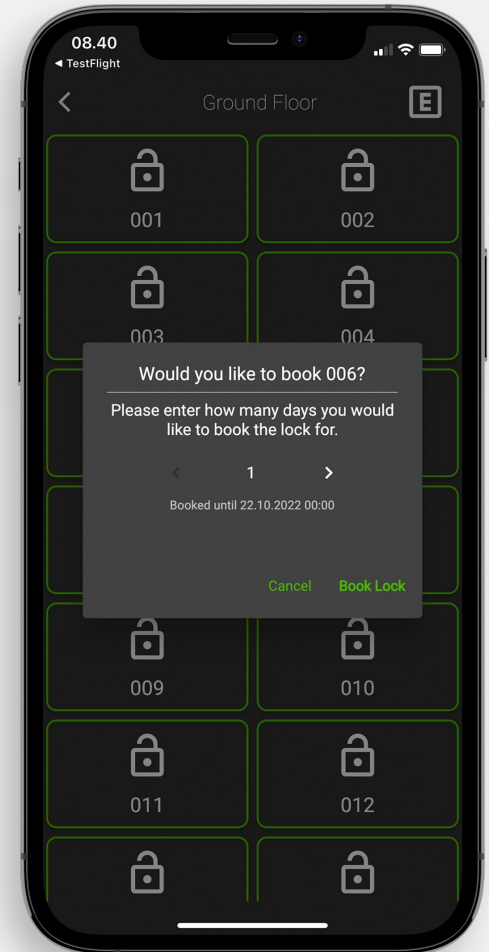

X LOCK

book iT by XLOCK is a cloud-based locker management tool within the XL Lock Manager App, developed in Austria. It is simple for users to control and ideally suited to agile working environments.

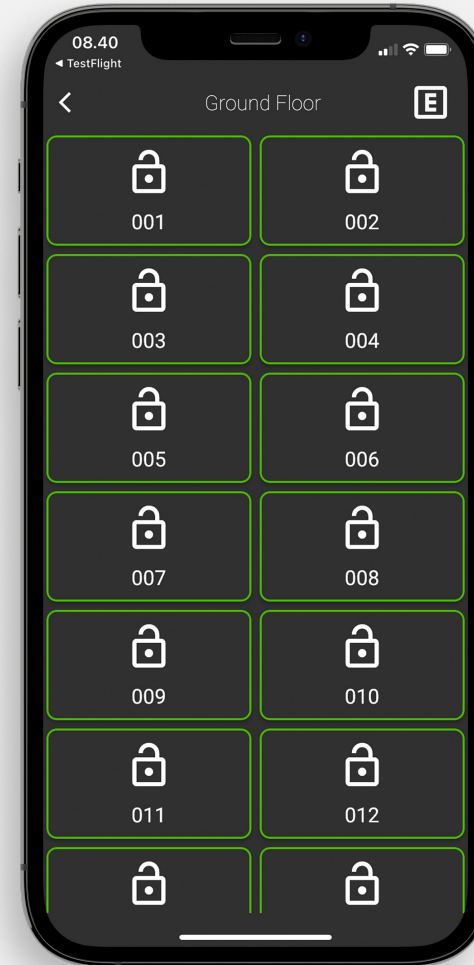

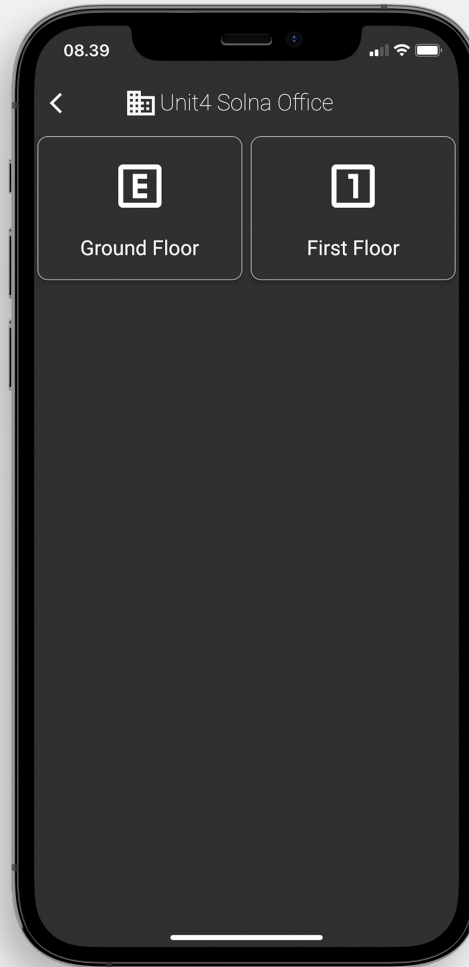

It works wirelessly via Bluetooth connecting the battery operated XLOCK furniture lock to a smartphone.

Locker users engage with the quick and easy self-service XL Lock Manager App to book a locker which becomes immediately available for use. The booking can be done at the office, in the train on the way to work or from home.

Minimal administration is required enabling companies to focus on the important areas of their business.

In the groups tab, available lockers are organised into Buildings and Floor/Zones/Areas.

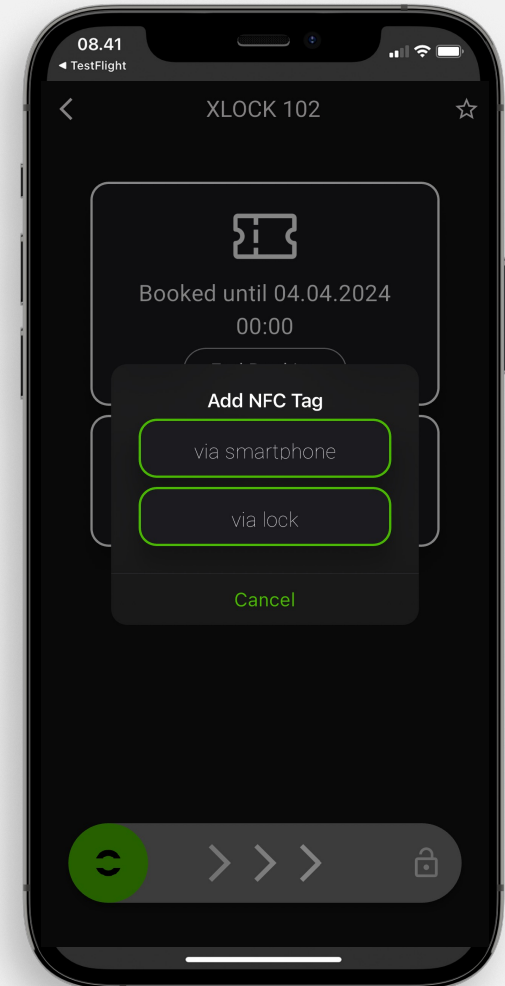

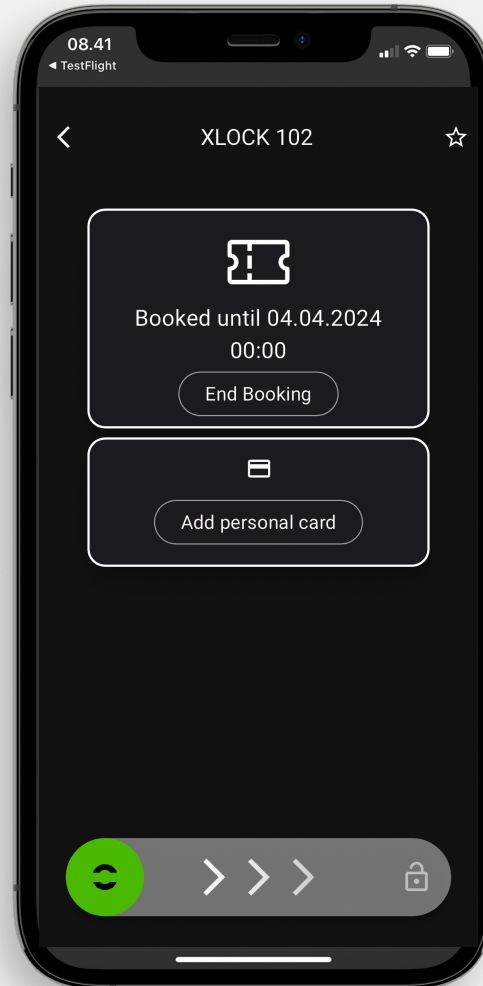

User selects locker and confirms booking – the locker is then immediately available for use.

User find the booked locker by the locker numbers on the locker.

Once booked, the locker appears on the user's "Locks" tab.

User clicks on the locker and the unlock screen appears.
