

# E-race

- 2 years guarantee
- Custom fit
- Soft TPE
- Noise reducing filters
- Includes Neckcord, Carry Case and User Manual
- Stay protected while hearing intercom in your helmet

E-race is recommended for motorcyclists, race drivers, as well as spectators at motorsport events. The E-race hearing protection plugs provides optimal attenuation of wind and engine noise. At the same time, it is possible to hear and understand speech from the surroundings or via Intercom. E-race is developed with two different handles for Left and Right, so it is easy to place the plugs in your ears. E-race has been developed and manufactured for the purpose that it can be used under the helmet without irritation. E-race is produced in medical approved soft TPE, via a 3D scan of the ears through earfabSCAN app. Now you can order your custom-made product regardless of location.

## **Certifications:**

CE Certified (1974)
