

E-sleep

- 2 years guarantee
- Custom fit
- Soft TPE
- Floatable function
- Includes Carry Case and User Manual
- 3 – 5 days delivery when scans have been received

Do you practice water sports, and would you like to protect your ears from Swimmers Ear? Then E-swim is the right solution for you. The advantage of custom-made swim plugs is that they are manufactured in medically approved, soft TPE via a 3D scan of the ears, through the earfabSCAN app. This allows your swim plugs to be placed in your ears for hours without any irritation. Even if the swim plugs are in close contact with skin, the swimmer or diver can still equalize pressure. E-swim reduces the risk of Swimmers Ear (ear canal inflammation). E-swim comes with a float function and is cleaned by rinsing under the tap.

Preliminary measure by
SoundHub Denmark (SNR): **30.6dB**
