

E-travel

- 2 years guarantee
- Custom fit
- Soft TPE
- Includes Carry Case and User Manual
- 3 – 5 days delivery when scans have been received

E-travel ensures a calm and uninterrupted journey. The earplugs attenuate annoying sounds, such as sounds from planes, fellow passengers and snoring. E-travel earplugs also ensure a nice calm working environment where damping of sounds up to 85dB is preferred.

The advantage of custom-made travel plugs is that they are manufactured in medical approved, soft TPE via a 3D scan of your ears, through earfabSCAN app. This allows E-travel to sit in your ears for hours without any irritation.
