

Product Data Sheet – Drill-Stop

Product Description

The **Drill-Stop** countersinking for deck screws. Pilot drilling is strongly recommended for fastening tropical woods/hardwoods. This is advisable even with the relatively easily splittable Douglas fir, and when screwing close to wood cut against the grain.

Drill-Stop

- Boring and countersinking in a single pass
- Screwing torque for inserting Terrasotec and Hapatec screws is greatly reduced, no more shearing of the screws, above all with the combination hardwood/stainless steel A2 or A4.
- Perfect seat of the screw head

Advantages

Product Data Sheet – Drill-Stop

Application instructions Aluminum Profile System Eveco
